

	AO1: Use and apply standard techniques	AO2: Reason, interpret and communicate mathematically	AO3: Solve problems within mathematics and in other context
Emerging	Accurately recall facts, terminology and definitions.	Make deductions, inferences and draw conclusions from mathematical information.	Translate problems in mathematical or non-mathematical contexts into a process or a series of mathematical processes.
Developing	Use and interpret notation correctly.	Construct chains of reasoning to achieve a given result.	Make and use connections between different parts of mathematics.
Secure	Accurately carry out routine procedures.	Interpret and communicate information accurately.	Interpret results in the context of the given problem.
Advanced	Accurately carry out set tasks requiring multi-step solutions.	Present arguments and proofs. Assess the validity of an argument and critically evaluate a given way of presenting information.	Evaluate methods used and results obtained. Evaluate solutions to identify how they may have been affected by assumptions made.
